DEFINITIONS AND EXPLANATIONS

FARM LAND -- Total land in farms is the sum of the acreage of all tracts reporting crops harvested or livestock produced during the previous year. This also includes the acreage in farm tracts which were idle during the year.

IDLE CROPLAND -- Includes all plowable cropland from which no crops are saved, land in soil improving crops (not harvested), and land on which all crops failed, but excludes cropland in pasture.

IMPROVED PASTURE -- The definition of improved pasture as used here is "Any pasture which has been seeded with recommended pasture grass mixtures such as Ladino or grass mixtures, fertilized or otherwise improved". This figure excludes new pasture seeded in the fall of 1952.

ALL OTHER PASTURE -- Includes all pasture not reported as improved, including woodland pasture as well as open non-improved pasture.

CROPS -- Reports for all crops except peanuts are for acreage harvested during 1952. The acreage of peanuts is acreage grown alone for all purposes and includes "acreage hogged", etc.

COMMERCIAL FERTILIZER -- The commercial fertilizer question was asked to include all applications of commercial fertilizer used on all crops and pasture during the entire year of 1952. Lime and land plaster are not included.

SOWS AND GILTS -- This question was asked "How many sows and gilts were farrowed during the six months between December 1, 1952, and June 1, 1953"? This includes sows farrowing after December 1, even if disposed of prior to reporting.

PEOPLE -- Includes only people living on tracts (3 acres or more) that had some form of agricultural activity in 1952. Previous years' population figures included people living on non-farm as well as farm tracts.
